

Washington University in St. Louis

SCHOOL OF MEDICINE

Program in Physical Therapy

January 20, 2008

To Whom It May Concern:

Rosanna Baroni has taken at least 7 courses in Movement System Impairments, she has helped translate the book, Diagnosis and Treatment of Movement Impairment Syndromes, into Italian. She has also demonstrated clinical competence in examination and treatment of patients with movement system impairment syndromes. Therefore I consider her qualified to teach courses in Diagnosis and Treatment of Movement System Impairments.

Shirley Sahrman, PT, PhD, FAPTA
Professor Physical Therapy/Neurology/Cell Biology
